DETAILED ACTION

1. Applicant canceled claims 1-30, and added new claims 31-65 in the preliminary amendment filed on 03/11/2003. The pending claims are 31-65.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 31-50 and 61-65, drawn to a method for interfacing with a multi-level data structure by selecting a concept object, displaying a first image, one or more second images, and displaying graphical elements representing an association between each first and second image, classified in class 707, subclass 104.1.
 - II. Claims 51-60, drawn to a method for displaying and creating relationships between different medical sources by selecting a medical concept, displaying another medical concept related to the selected one, displaying a billing code, medical code, classified in class 705, subclass 3.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. For example, Group I is drawn to a method for interfacing with a multi-level data structure by selecting a concept object, displaying a first image, one or more second images, and displaying graphical elements representing an association between each first and second image. Group II is drawn to a method for displaying and creating relationships between different medical sources by selecting a medical concept, displaying another medical concept related to the selected one, displaying a billing code, medical code. See MPEP 806.05(d).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicants are advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicants is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be
